EDUCATION

B.S. Computer Science, BITS Pilani

08/2024 – Present

WORK EXPERIENCE

Frontend Engineer (Freelance), @VeBlyss

09/2025 – 10/2025

- Developed and delivered a **professional export-business website for VeBlyss Global, serving international customers** across multiple product categories.
- Built responsive and visually **appealing frontend interfaces** using modern UI/UX principles, ensuring seamless performance across desktop, tablet, and mobile devices.
- Designed and implemented product **showcase sections for Leather Products, Copper Products, Jewellery, Handicrafts, Sustainable Products, and Agricultural Products.**
- Integrated **WhatsApp and Email enquiry workflows**, improving customer communication and lead generation.
- Developed reusable UI components and optimized navigation, enhancing user experience and website maintainability.
- Collaborated directly with the client to gather requirements, incorporate feedback, and deliver production-ready solutions.
- Successfully completed the **freelance project with high client satisfaction, strengthening the company's digital presence and brand visibility.**

SKILLS

Programming Languages

Java, JavaScript, TypeScript, Python, C++

Frontend Technologies

React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend Technologies

Spring Boot, Node.js, Express.js, REST APIs, JWT Authentication

Databases

MongoDB, PostgreSQL, Redis, Qdrant

AI / ML Technologies

RAG, LangChain, Hugging Face APIs, Gemini API, Vector Search, Prompt Engineering

Cloud & Dev Tools

Git, GitHub, Postman, Firebase, Docker, Render, Vercel

PROJECTS

InsightLM : AI Document Intelligence Workspace

- Built a full-stack document intelligence platform **using RAG, Qdrant, and Hugging Face models** for grounded document conversations.
- Implemented **advanced CRAG pipelines with query rewriting, relevance judging, citation-based retrieval, and real-time SSE streaming.**

Clonify : AI Website Cloner Agent

- Developed an **AI-powered website cloning agent using Playwright and Gemini that analyzes and recreates websites from a single URL.**
- Built a self-improving generation pipeline with **automated evaluation loops, design extraction, and section-wise website generation.**

GitUpskill : AI Developer Skill Recommendation Platform

- Built an **AI-powered platform that analyzes GitHub repositories to identify developer strengths, skill gaps, and growth opportunities.**
- Implemented personalized learning roadmap generation using **GitHub metadata analysis, OAuth authentication, and rule-based recommendation engines.**

ACHIEVEMENTS

CP TRACKER

- LeetCode**
- CodeChef: 1696 (3*)**

ACCOMPLISHMENTS

Meta PyTorch OpenEnv Hackathon Qualifier: Qualified among 31,000+ participating teams.
